

BAG IN BOX SYSTEM / IBC - IBC 1000 EK

PRODUCT OVERVIEW

Due to its thought-out construction, the Intermediate Bulk Container (IBC) is a reusable transport system for liquids which saves money within the goods cycle.

Advantages in comparison to traditional one-way transport tanks:

- Costs per transport are reduced considerably
- ❖ Reusable container (only liner bag is disposable)
- ❖ Hygiene – no decaying, no corrosion, easy cleaning
- ❖ Safety – product is protected; in combination with the RFID transponder the IBC can be traced
- ❖ Easy filling, emptying and transport
- ❖ Optimal space utilization – stackable and collapsible

The new IBC has a considerable cost advantage in comparison to conventional systems due to the collapsible construction and the changeable liner bags.

The new IBC offers maximum safety and hygiene through changeable liner bags – on request also available in antiseptic form.

PRODUCT SPECIFICATION

Article No.	IBC 1000 EK
Outside dimensions:	120 x 100 x 125 cm
Inside dimensions:	111 x 91 x 103 cm
Height collapsed:	43 cm
Useful height:	103 cm
Weight:	102 kg
Volume:	1000 l
Loading capacity:	1300 kg
Statistic stackable:	1+5
Dynamic stackable:	2
